

Mushroom People

-vertigo-

press release:

With their latest single “Vertigo”, Mushroom People want to start a new chapter of their career. “Vertigo” is about freedom, it's about letting go, outgrowing yourself – and all the fears that are coming with it. The track has a dream poppy vibe, carried by singer Lenny's deep, all consuming vocals. Once you listened to it, you can't stop but pushing the replay button. Within just two and a half minutes you'll hear emo guitars, future bass drops, trap music and string arrangements but in the end it'll all make sense. That's for sure.

“At some point last year we found ourselves not writing the music we really like, but now with some time to rethink the whole project we finally managed to create something we deeply care about.” - Lenny, Mushroom People
